RE: Transparency Statement of Evaluation Data and Results for Indonesia
Evaluation of On-grid Renewable Energy

As per MCC guidance on responsible data management¹ and following Integra's requirements for responsible data management, the data associated with this evaluation is not available for public and/or restricted access use.

This data was the result of key informant interviews and focus group discussions where the participants requested to remain anonymous. Moreover, data on individual grantees is complicated because the data can be easily linked to the grantee, given that three of the four grantees (biogas plants) were from the same parent company, and the fourth was a hydro plant.
